

CLEVELAND SOCIETY FOR THE BLIND

ANNUAL REPORT

Mrs. J. Kenneth Cozier is shown receiving citation from The Cleveland Society for the Blind at its sixty-sixth Annual Meeting. The citation was presented by Board of Trustees Secretary, Douglas Wick

DEDICATION

In memory of Mrs. J. Kenneth Cozier, one of the most unpretentious of women who devoted much of her life to the service of others, the Cleveland Society for the Blind dedicates this 1972 annual report.

As an active member of the Sterling Committee since 1930, her loyalty and sincerity were a source of strength to the Society, the Committee and to those blind persons she served. In her continuous 42 years of service, she contributed to the growth and prosperity of the Society.

As a past chairman of the Sterling Committee and as a member of this committee, Mary Cozier served as a friendly visitor; volunteer driver, taking individuals to hospitals, club meetings and to camp; a "chief cook and bottle washer" at club meetings and a hostess and partner at dances.

During the early 1930's when the Society had annual sales in the major department stores, Mrs. Cozier was one of the most enthusiastic supporters of the program and served both as chairman and "saleslady" behind the counter.

At the old Grasselli house on East 55th Street, Mary Cozier's fine hand was evident through the staging and costuming of many plays presented by blind people there.

A personal undertaking which has brought much pleasure for many years has been the beautiful Christmas decorating for the Society, both at the former center on 93d and at the Sight Center.

Her help and encouragement cannot be measured — but it shines through the lives of many persons without sight.

She was truly a dedicated volunteer who gave much of herself and asked nothing in return.

. . . many were served . . . these are just a few.

... REVIEW OF THE YEAR, 1972

At the Cleveland Society for the Blind, we see thousands of people every year . . . visually handicapped people, their families and friends.

They come to the agency seeking help and reassurance available to them. They are people . . . and the hub of our rehabilitation center . . . our industrial workshops and our food services program.

We are pledged to serve their needs — with the greatest possible skills — with concern — and with humanity.

Today, the emphasis is on the individual — not on his handicap, on his potentials — not on his limitations.

The goal of the agency is to enable each one seeking help to maximize his strengths and minimize his difficulties.

This has been an exciting year for the Cleveland Society for the Blind . . . at the Industrial and Food Services building where expansion and remodeling is almost completed . . . and at the Sight Center with its substantial growth in services to the visually handicapped.

Indeed, this past year has marked the greatest year in the history of the Cleveland Society for the Blind in regard to service.

SOCIAL SERVICES

During the year 1972, 610 new referrals were made. Within the framework of the Social Service Department, rehabilitation home teaching serves as an important skill strengthening discipline for those clients who cannot come into our Rehabilitation Center.

During the past year, caseworkers made 1,477 home visits and had 654 office interviews with clients. 185 clients had rehabilitation teaching both at home and at the agency.

Caseworkers and rehabilitation home teachers participated in the Purchase of Service Agreement between the Society and the Ohio Bureau of Services to the Blind. The primary aim of the agreement is to strengthen elderly individuals' self resources so that they do not become institutionalized.

Low Vision Clinic, with its varied inventory of magnifiers for close reading and distance visual aids, served 460 partially-sighted persons. Aids and Appliances Department served more than 520 individuals directly or through family and friends.

During 1972, the 2,000 mark was almost reached as the number of Talking Book machines the agency has out on loan and during the year; 711 of these machines had some sort of service.

COMMUNITY SERVICES

In 1972 the Community Services Division of the Cleveland Society for the Blind concentrated strong efforts on improving existing programs and introducing new ones.

Two extremely diverse activities saw skiing lessons given to blind adults for the first time — and a series of lectures and small discussion groups touching on the various aspects of eye care and eye problems for older persons.

1972 saw the revival of dancing lessons offered at and by the Arthur Murray Dance Studios . . . and through special funds from the Kulas Foundation, a group of talented blind musicians were reimbursed for performances given to patients and residents in nursing homes and homes for the aged.

May, 1972, was a memorable month as several hundred volunteers were recognized with ceremony, pins and certificates at the quintennial volunteer recognition luncheon.

This was followed by the May Festival highlighted by appearances of Robert Smithdas, Bob Allen and a special two-day program by visually handicapped children.

Fifty-five persons, blind and sighted, went on the trip to Delawana Inn at Honey Harbor, Ontario, sponsored by the Young Adult Club, and special summer outings included trips to the Billy Graham Crusade, the Cathedral of Tomorrow and the annual picnic sponsored by the Hinckley Lions Club.

In addition to the above, the major program of the Community Services Division continued, including Highbrook Lodge (297 different campers), the Group Work program with over 600 different individuals participating in all social clubs, activity groups, special events, open houses, etc., volunteer office (570 different clients receiving transportation services, 314 personal services, 52 friendly visiting), taping office, prevention of blindness, etc.

Bulletin Board Worker

INDUSTRIAL DIVISION

During 1972, the Industrial Division of the Cleveland Society for the Blind continued its training for those who will go on to jobs in sighted industry, as well as giving employment to those who prefer the security of a sheltered workshop despite the confusion caused by the building program at the 55th Street plant.

Ability to perform on the part of the workers was affected by this confusion ... and efficiency suffered at times.

In spite of this, figures for over-all sales and wages paid to blind workers reached an all-time high.

An increase in the number of products manufactured at the Industrial Division for the Rack Program went from 8 to approximately 40 — and many items which showed a loss being taken on them were dropped from the program.

1972 saw the Industrial Division working hand-in-hand with the Rehab Services to bring new "blood" into the workshops. As a result, many new workers were added to the payrolls.

The new building was officially turned over to the workers in December but moving into the new part was done in "bits and pieces." Already in place—and operation—are the new broom winding and stitching equipment; mop winding equipment; sewing machines and Towmotors for handling materials. All of these were purchased with money from a grant of Ohio Rehabilitation Services Commission.

A new line introduced late in '72 featured a new Wearever Plastic Broom, due to "revolutionize" any sweeping problem.

Broom Shop Worker

FOOD SERVICES

The training program of Food Services is a unique program providing an outstanding opportunity to any qualified visually handicapped person in the United States to study all facets of a food management operation. During 1972, 31 students enrolled in the course.

In the Cleveland area, 66 persons were employed as Snack Bar Operators in a program which had a 13½% increase in sales over 1971. Profits were up by over 21%.

Three new stands were opened and two were remodeled. The new stand at the West Park Rapid Station will become the agency's first convenience market early in 1973.

Food Services employs 66 Snack Bar Managers and assistants

There are 45 stands in the Greater Cleveland area

. . . new puppy for Christmas

CHILDREN'S SERVICES

Children's Services "went to the dogs" in 1972!

Literally — beautifully — and wonderfully, what with Barney, the talking dog — and four darling Golden Retriever pups.

The puppies were donated to the Cleveland Society for the Blind just in time for the agency to play Santa Claus and pass the puppies (at the request of the family which gave them) on to four blind children. If you heard some extra squeals around about that time, they came from both delighted children and dogs.

Barney, gift of the Pioneers, is a wondrous Talking Dog which was used primarily to tell blind children all about services in the Talking Book and Braille Library.

Pat Stone, Ohio Bureau of Services for the Blind Children's Services Director, visited all of the three Braille classes in the public schools with Barney and Mrs. Peters, the children's librarian from the Library for the Blind.

Barney was also used to entertain many children visiting the agency.

Thirty-two new blind youngsters—most preschool aged—were referred in 1972. Some of these children visited Highbrook — and last year, a dozen multiple-handicapped youngsters spent four fun-filled glorious days at the camp.

Children's Services thank the many community groups who made Touch and Tell books for the children . . . the Scouts who gave up exchanging Christmas presents with each other to buy a loom for two blind children . . . the "A Special Someone" series of articles . . . the Brown Optical Co. for its annual Christmas party and the United Torch for visiting and making a film at Highbrook when the children were there.

Teenagers continued to plan their own activities for the Teen Club in 1972. Highlights were the Valentine Dance and an overnight at camp.

... Barney - with friend

REHABILITATION DEPARTMENT

At the close of 1972, 199 individuals were treated or were in the process of receiving treatment in the Rehabilitation Department. (A person "going through" rehabilitation may spend anywhere from four to twenty weeks in the program.) Not all of the services provided to this group were limited to the facilities at the Sight Center. With the expansion of the mobility unit, blind persons were being served in their area of residence.

In February, the State Bureau of Services for the Blind and the Cleveland Society for the Blind developed a Purchase of Service Contract providing a financial background for our agency on the assumption that contractual obligations were met. These included: 1) The development of the home industries program; 2) Team training in readiness for homemaking or return to employment; 3) The development of additional job opportunities in the Industrial Division; and 4) The development of additional snack bar possibilities for the State in Lorain and Lake Counties. In September the contract was revised and extended to June 30, 1973. However, as of December 31, 1972, we, as one of the contracting parties, see all aspects of our contractual obligations being met.

A pilot program at Cleveland State University for the preparation of orientation and mobility instructors and rehabilitation teachers at the baccalaureate level was instituted during the year. While this program needs to be strengthened and moves to do so are now under study, the agency has benefited in that it has employed one of the graduates in orientation and mobility and has currently enjoined the services of two interns in the rehabilitation teaching program.

. . . gaining independence *

... a pretty girl learns to weave *

In summary, the following are some of the factors which have had a significant bearing on the continued development of the service areas in 1972:

- 1. A Purchase of Service Contract with the Bureau of Services for the Blind, State of Ohio;
- 2. The support of the State agency in making available funds for the projected expansion of the Sight Center;
- 3. The addition of the following instructional areas in the Rehabilitation Department:
 - a. Techniques of oral communication
 - b. The use of the abacus
 - c. A class in occupational information and placement;
- 4. Departmental strengthening due to the acquisition of three master's degree level persons, the stability and development of the existing staff, and a continuing desire on the part of the agency administration to upgrade that staff;
- 5. The continuing use of the department and the agency for internships by Cleveland State University, Kent State University, Case Western Reserve University and Ohio State University;
- 6. The availability and use of a strong rehabilitation department advisory committee;
- 7. A continued provision of services in Optacon training, and at the close of the year having our agency designated by the Veterans Administration as the officially approved training program for blinded veterans in this field.

PUBLIC EDUCATION & INFORMATION

407

educational programs were arranged for club, PTA, church and industrial audiences.

15,588

people were addressed by volunteer speakers and members of our staff.

7,794

students participated in CSB education programs.

201,560

people viewed CSB films

683,138

pieces of educational literature were distributed

1972...a good year

We repeat — this has been an exciting year for the Cleveland Society for the Blind. It has also been a year of problems and decisions, one of the most acute being the desperate need for more space. The decision to build an addition to the Sight Center was made by the Board of Trustees and plans are underway. Construction will start early in '73 with completion target set for 1974.

The Cleveland Society for the Blind continues to be a training ground for students at all levels. Under many new programs in high schools — students are given time off in order to gain experience in the real world. The Society has provided good learning experience for a number of such students. Similar programs exist at the college level — ranging from limited exposure to a complete field work and internship under the social service program of Cleveland State University. The Cleveland Society for the Blind has also had some WIN (Work Incentive Program for ADC Mothers) students and field work students from the Special Urban Services Project of the School of Library Science.

Society staff has been active on the advisory committees of a number of special programs seeking to coordinate and expedite delivery of services to older persons in housing projects.

Again — our deep-felt thanks and gratitude to the hundreds of dedicated volunteers whose work makes the Cleveland Society for the Blind possible. Their presence is everywhere: the Board of Trustees, the advisory committees, the women's committees and all those who drive or serve directly as guides, readers, teachers and visitors (1972 saw establishment of a volunteer coordinator for friendly visiting), those who help with office and clerical work; those who work on "Touch and Tell" books; those who sit alone and tape countless pages for blind students and others; the thousand PTA mothers who volunteer for Preschool Vision Screening; and the retirees who help both at the Sight Center and at the 55th Street building. We are deeply indebted to you all.

Our thanks, too, to those wonderful people of the Press, Radio and Television for helping us have a good 1972.
